we employed several qualitative data collection. Keywords: Focus on form, corrective feedback, speaking tasks, interaction. Long (1991, 2000) proposed an approach called FFI (form-focused instruction). The learners in treatment group received corrective feedback in the form of prompts. One of the limitations of meaning-focused instruction in the EFL context is that a communicative approach is not investigated. These findings suggest that focus on form can be an effective tool for investigating the effects of focused and unfocused. As grammar is an instrument to form meaningful sentences (Thornbury, 1999), grammar teaching is an imperative matter to be considered in Ellis (2001) characterizes Form Focused Instruction (FFI) as “any planned or incidental instructional activity that involves focusing on linguistic form.” Introduction: Investigating form-focused instruction.
